Adding and Removing Keys

To add a new key card or key fob:

Note
When adding a key fob, ensure it is at room temperature. Pairing a key fob that is very cold can be unsuccessful.

1. On the touchscreen, touch **Controls > Locks > Keys > Add Key**.
2. Scan your new key card or key fob on the card reader located on the wireless phone charger. To scan the key fob:
 - Place it at the top of the left phone charger, against the center divider.
 - Point the front of the key fob down.
 - Swipe downwards (as shown in the image).When you hear a chime and the new key is recognized, remove it from the card reader.

3. Scan a key card or key fob that has already been paired to the vehicle to confirm new key pairing.
4. When complete, the key list includes the new key. Touch the associated pencil icon to customize the name of the key.

Removing a key:

When you no longer want a key to access Model S (for example, you lost your phone or key card, etc.), follow these steps to remove it.

1. On the touchscreen, touch **Controls > Locks**.
2. In the key list, find the key that you would like to delete and touch its associated trash icon.
3. When prompted, scan an authenticated key card or key fob on the card reader to confirm the deletion. When complete, the key list no longer includes the deleted key.

Note

Model S requires at least one authenticated key card or key fob at all times. If only one key card remains on the key list, you cannot delete it.
